GENERAL INFORMATION: Patent No. US20020061569A1

APPLICANT: Haselbeck, Robert

```
APPLICANT: Dilley, David R
APPLICANT: Kadyrzhanova, Dina K
APPLICANT: Wang, Zhenyong
APPLICANT: Wanner, Toni M
TITLE OF INVENTION: Modified Synthetases To Produce Penicillins and
TITLE OF INVENTION: Cephalosporins Under the Control of Bicarbonate
FILE REFERENCE: MSUA1-453
CURRENT PILING DATE: 2001-08-08
PRIOR APPLICATION NUMBER: US/09/924,841
CURRENT FILING DATE: 1999-10-06
NUMBER OF SEQ ID MOS: 18
SOFTWARE: Patentin Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      APPLICANT: Yamamoto, Robert T.

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                           126

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
